Ground Bolt and Ground Ball

For use with the Scully Intellitrol® & ST-47 Groundhog Vehicle-Mounted Static Earthing Device

Featuring Dynacheck® – Automatic and Continuous Self-Checking Circuitry

DESCRIPTION
If you load at terminals where the Scully Groundhog is incorporated with the existing Scully Overfill Prevention System, you need a Scully Ground Bolt on your vehicle. The Bolt is mounted directly to the vehicle frame and wired to the existing truck-mounted Scully Socket(s). This allows you to perform only one connection for overfill and earthing verification.

If you load at terminals which have a Scully Groundhog mounted independently at the gantry, you need a Scully Ground Ball mounted directly to your vehicle frame.

The grounding connection is completed with a special quick release plug and cable assembly that plugs onto the ball.

The Scully Ground Bolt and Ball contain “smart” electronic circuitry which offers an intelligent return signal to the Groundhog Control Monitor. This “smart” circuitry verifies that a proper connection is made before loading can begin. If the earthing connection is broken during loading operation, the operation ceases.

FEATURES AND BENEFITS
- Prevents loading until a proper static earthing has been established.
- Automatically shuts off the loading operation if the earthing is broken at any time during loading.
- The Ground Ball or Bolt can be installed easily.
- Provides intelligent earthing verification with self-proving connections to the Ground Ball and Bolt.
- Self-proving feature provides visible proof that a proper vehicle static earthing has been made and automatically permits loading.
- Suitable for tank cleaning and other applications where verifiable earthing is needed.
- Known for dependability, maximum safety and service common to all Scully Systems.

TECHNICAL SPECIFICATIONS

GROUND BOLT
Material: Stainless Steel, Stainless steel nut and lockwasher.
Thread Size: 1/2 –13 UNC
Pigtail Length: 1820 mm long
Installation Torque: 125 inch pounds maximum

GROUND BALL
Material: Stainless Steel, Stainless steel nut and lockwasher.
Thread Size: 1/2 –13 UNC
Ring Lug: 6.3mm through hole
Pigtail Length: 304.0 mm long.
